

GREEN ACTION

in Central Tottenham

Let's promote and create a sustainable future

At a time of worsening climate and biodiversity crises, everyone needs to recognise and get to grips with the situation. Let's take action together to make real change. The solutions are all around us. We can take responsibility in our own lives, and collectively in our own neighbourhoods, whilst also demanding effective action by companies and governments. To help in this we propose to set up a new group, **Green Action** in Central Tottenham [GACT], drawing inspiration from existing projects, activities and campaigns, and from our communities.

Lordship Hub and Lordship Rec provide a fantastic base and opportunity for promoting a wide range of environmental sustainability issues and good practice in our surrounding communities. Over the last 20 years the community has led on the transformation of Lordship Rec, turning a neglected and barely-used park into a thriving venue for wildlife and the people of Tottenham. Lordship Village!

**Launch of Green Action group based in the Rec.
Promoting sustainability around central Tottenham - All welcome!
Sunday September 24th, 1pm-3pm
at Lordship Hub, Lordship Rec N17 6NU**

SOME LORDSHIP REC ACTIVITIES WHICH CAN INSPIRE AND LINK TO WIDER ACTION IN OUR COMMUNITIES

Energy and climate Lordship Hub is run by and for the community. It has a special carbon-neutral 'passivehaus' design, solar energy panels on the roof, and hosts a Weather Station to help raise public awareness about our changing climate.

Biodiversity Lordship Rec's biodiversity has improved so much that it has recently been designated a Site of Borough Wide Importance for Nature Conservation. The Friends of the Rec help maintain and manage the woodland, lake, orchard, river channel and grasslands.

Local Food-growing Volunteers grow organic food in the Harmony Gardens and in the orchard field, and run an annual Flower & Produce Show showcasing local produce. And there's also a well-maintained allotment site next to the Rec.

Flood Control The River Moselle flows through a flood plain and now has additional control features which could help prevent future flooding downstream.

Green travel Cycling is being promoted by the Rockstone repair and sales workshop, by Wheelytots sessions in the historic Model Traffic Area, and by users of the loop track. There are also currently 7 walking groups each week. People can use the Rec and other green spaces as alternative routes to nearby car-filled roads.

Waste and recycling Lordship Hub composts much of its food waste, and hosts a monthly Repair Club so appliances can be re-used not thrown away. However other recyclable Hub waste goes to landfill as the Parks Service has not yet brought in proper recycling - can you help us lobby about this? Parks staff do compost the park's green waste though. Volunteers from the *Lordship Litterpickers* regularly help out in the park.

Healthy living There are a range of groups based in the park and in the Hub which organise sports teams and fitness sessions. There's also an outdoor gym. Healthy food is provided by the Hub cafe. And being in the park is great for general well-being!

Community spirit and empowerment Lordship Rec is co-managed jointly by the community and Parks Service. The Rec and Hub promote positive lifestyles, community activities and initiative. 20 different user groups are based in the Rec.

But in the light of the worsening global crisis we need a specific group to promote long-term environmental sustainability around our local communities. Such a group could host discussions and film showings, spread ideas, lobby the authorities for better policies, and link to other green initiatives and campaigning activities throughout Haringey

Supported by the Lordship Hub Co-operative

Support GREEN ACTION!

Launch meeting on Sunday September 24th, 1pm-3pm at Lordship Hub, N17 6NU

Yes - I support this, please keep me updated
